How do we update our OpenURL link resolver in WorldCat Discovery?

Last updated: Thu, 10 Mar 2022 16:23:53 GMT

Applies to

- WorldCat Discovery

Answer

To manage your URL resolvers, navigate to the [Service Configuration > OpenURL Resolvers > Manage Resolvers](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/Our_institution_recently_cha...). Scroll over the resolver name you want to edit or delete. This will allow you to see the edit or remove options. If you would like to create a new resolver click [Create Resolver](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/Our_institution_recently_cha...).

Additional information

For more information regarding updating your library's OpenURL resolvers, please see [Managing Resolvers](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/Our_institution_recently_cha...).
