What ports are required for ILLiad?

Last updated: Tue, 11 Feb 2020 16:35:09 GMT

Applies to

- ILLiad

Answer

Here is the documentation for the required [Network Ports](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/What_ports_are_required_for_ILLiad). For hosted ILLiad user, we allow connections to the SQL server on 1433 and 1344.

In the SQL Alias Manager to switch from the default port (1433). You would enter this on the server line (Yourserver.illiad.oclc.org,1344)
