How can I see which libraries own my work?

Last updated: Fri, 02 Sep 2022 18:55:31 GMT

Answer

To see which libraries currently own your work:

1. Search for a title in WorldCat.org.
2. Select the appropriate item from the search results list.
3. Locate the Find a copy at a Library section beneath the item's cover and general information.
4. Make sure the filters in the upper right side of the box are all set to display Any format, Any edition and Distance within 200+ km.
5. Switch to the All Libraries tab.
6. This is the list of all libraries that have set holdings on the title within WorldCat.

Note: Library types that don’t usually allow patron access won't appear in this list. If you are a library that wants to appear anyway, contact OCLC Support with your Library name, OCLC Symbol and Contact information.
