When search results have multiple records and click on the number, not the LHR, it immediately goes to the LHR record

Last updated: Mon, 10 Jun 2019 17:48:37 GMT

Symptom

- I search for a book and it has multiple records and click on the number, not the LHR, it immediately goes to the LHR, not the Bib Record.

Applies to

- Connexion browser

Resolution

1. On the basic search screen Show (Local holdings) if Single Record Found, near the bottom of the search screen. It should be set to Bibliographic record. Then if you hit the number for the record the Bibliographic record will show
