How do I limit what a patron sees in the Outstanding Requests in ILLiad?

Last updated: Thu, 01 Aug 2019 15:32:51 GMT

Symptom

• You want to limit what information is produced in the output that a patron sees so they do not see it, or what they see is what you want them to see in the Outstanding Requests

Applies to

• ILLiad

Resolution

You can limit what a patron sees or decide what a patron sees in the Tables that show up on different Web Pages such as Outstanding Requests. Here are the two different areas you can look at for more information:

1. Display Statuses. You can limit what the patron sees for the Transaction Status from the Creating Display Statuses documentation.
2. Table Tags. You can control what Columns will display in a table in the Table Tags documentation.
