I am trying to customize my layout in the ILLiad Client, but I do not see the field I want when I go to the Hidden Items tab

Symptom

- You are looking to add a field that is in the Transactions table in your Customized Layout, but it is not showing in the Hidden fields tab

Applies to

- ILLiad

Resolution

When you are in your Customized Layout, you have two tabs. One is for Hidden Items, and the other is for Layout Tree View. Select the Layout Tree view and you will see additional fields you do not see in the Hidden Items tab. If it does not exist there, then you cannot add the field.
