Symptom

- I would like to generate a report off of a standard WMS report. For example, I am using the "branch holdings by shelving location" report that I have opened from Report Designer. The report option appears but after entering a start date, no report options become available.

Applies to

- WorldShare Analytics

Resolution

Please check your WorldShare account to see that you have the Analytics Report Author role assigned. This should allow you to create ad-hoc reports inside report designer.

Additional information

If you do not see the role available, check with someone at your institution who has the Analytics Report Author Admin role. Or, please contact OCLC Support.
