Is it possible to search by only the first subject tag in the MARC record?

Last updated: Thu, 26 Sep 2019 13:26:54 GMT

Symptom

- You’d like to search by subject, but want to get only the first subject tag assigned rather than searching every subject tag in the record.

Applies to

- Connexion client
- Connexion browser
- WorldCat.org
- WorldCat Discovery

Resolution

No, this is not possible. When indexing of MARC records occurs it does not differentiate by the position of the subject tag in the MARC record.

Additional information

There is more information about the subject index.
