What do the different Theme Selectors look like in ILLiad 9.0?

Last updated: Thu, 26 Sep 2019 18:33:15 GMT

Symptom

- You want to know what the different Theme Selectors look like in 9.0

Applies to

- ILLiad

Resolution

The display appearance in ILLiad 9.0 has changed and you cannot have it look like it did in 8.7. There are new themes options which are changes in the colors of what you are seeing. Attached are what the different skin types that there are in 9.0. There are also no options for all the characters to show in CAPS. More information is also found in the Theme Selector documentation.
