Why am I unable to add a new record in the ILLiadWebPlatformConfig table in the Customization Manager?

Symptom

- The button to create a New Record in the ILLiadWebPlatformConfig table is grayed out

Applies to

- ILLiad

Resolution

New records can only be created by selecting the WebPlatformConfig table that has the green table icon, not in the "ILLiadWebPlatformConfig" icon with the key icon.

Note: Once in the WebPlatformConfig table, also make sure no items within the table have been double-clicked on, as this will gray out the create New Record icon as well.

Following these steps will enable New Record creation in the WebPlatformConfig table.
