Why was I able to find a record in WorldCat Discovery and not Record Manager?

Last updated: Tue, 12 Nov 2019 14:41:36 GMT

Applies to
- WorldCat Discovery
- WorldShare Record Manager

Answer
The record you found was in a database other than WorldCat. You can see this by looking at the description and noting if there is an OCLC number or a unique identifier. An OCLC number indicates the record is in WorldCat, a unique identifier indicates the record came from a database other than WorldCat.
