Is it possible to use a SAML connection to authenticate users into their ILLiad accounts without the use of EZproxy?

Question

- Is it possible to use a SAML connection to authenticate users into their ILLiad accounts without the use of EZproxy?

Applies to

- ILLiad

Resolution

Yes, as long as your site is on ILLiad 9.2. For assistance contact OCLC Support. If you are self-hosted, there is documentation on the RemoteAuth: Configuring the Integrated SAML Module page.
