Unable to see non-Latin script in Connexion browser

Last updated: Thu, 12 Mar 2020 18:16:45 GMT

Symptom

• Get message Non-Latin script is suppressed and only romanized text appears in Connexion browser.

Applies to

• Connexion browser

Resolution

Non-Latin script data in a WorldCat record does not display when you open the record using the Connexion browser. "Non-Latin script suppressed" displays in the upper right of the record. You cannot lock or replace these records.
