Is there a way to change the default internet browser ILLiad opens links in within the Client or Customization Manager?

Last updated: Mon, 06 Dec 2021 17:59:56 GMT

Symptom

- Is there a way to change the default internet browser ILLiad opens pages within the Client or Customization Manager

Applies to

- ILLiad

Resolution

There is no functionality within ILLiad that changes the web browser that links open up into. The only thing to check would be the Windows default browser settings on the PC.

The addition of Chromium Browser as an addon was mentioned in Atlas' ILLiad 9.0 release notes:

Chromium Browser information
Chromium Web Browser information

In ILLiad 9.2, there will be changes that allow you to use a different browser. It is scheduled for release in early 2022.
