In which table is the information from the Imported Request tab pulling from in the ILLiad SQL Server?

Last updated: Thu, 13 Aug 2020 17:19:45 GMT

Symptom

- In which table is the information from the Imported Request tab pulling from in the ILLiad SQL Server?

Applies to

- ILLiad

Resolution

The information is stored in the database in the Request Text field of the LendingRequests table. The table has only two fields, TransactionNumber and RequestText.
