Why doesn't the record display options or the correct links when linking to the A-Z list?

Last updated: Thu, 04 Feb 2021 14:50:49 GMT

Applies to

• A-Z list
• OCLC link resolver

Answer

To find an item in the A-Z list that is part of your library's WorldCat knowledge base, the information sent in a search must include the following:

• ISSN
• Title
• Page number
• Publication date
• Volume number (if applicable)

Please note, if all if this information is not included, the system will make the best match possible and this may not include all links or fulfillment options.

Additional information

Please see A - Z List and OCLC Link Resolver for more information.
