Discover how to share lists via Facebook, Twitter, email, or permalink using WorldCat.org.

Overview

You can share a list on WorldCat.org using any of the following methods:

- Facebook
- Twitter
- Email
- Permalink

**Share a list on Facebook**

1. From the My Lists screen, click the title of the list you want to share.
2. From the list, click **Share > Share on Facebook**. A Facebook log in dialog opens.
3. Enter your Facebook **Email or Phone** and **Password**.
4. Click **Log In**. A pre-populated post opens with a link to the list.
5. Click **Post** to share.

**Share a list on Twitter**

1. From the My Lists screen, click the title of the list you want to share.
2. Click **Share > Share on Twitter**. A Twitter log in dialog opens.
3. Enter your Twitter **Phone, email, or username** and **Password**.
4. Click **Log in**. A pre-populated tweet opens with a link to the list.
5. Click **Tweet** to share.

**Share a list via Email**

1. From the My Lists screen, click the title of the list you want to share.
2. Click **Share > Share via Email**. The default email client or app on your device opens with a pre-populated email containing a link to the list.
3. Enter one or email addresses in the To field.
4. **(Optional)** Edit these fields:
   - Your name
5. Click **Send**. An email message with a link to the list will be sent to the selected recipient(s).

### Share a list via permalink

A Permalink or permanent link is a simplified URL for a webpage that is designed to be short and easily interpreted. Permalinks are ideal for use in emails, blog posts, and other web-based communications where lengthy URLs might cause a problem.

To share a list via permalink:

1. From the My Lists screen, click the title of the list you want to share.
2. Click **Share > Copy link**. A Copied confirmation dialog appears in the lower-left corner of your browser. The permalink is now available for you to copy to another location.
