How do we change the patron password when we are using ILLiad Authentication?

Last updated: Fri, 17 Sep 2021 14:04:37 GMT

Applies to

• ILLiad

Answer

You can use the ILLiad client and follow the instructions for Changing User Passwords, or the patron can click on the "Forgot Password" link on the logon page to reset their password.

Additional information

Both the logon.html and logon2.html pages by default have a forgot password link. If you are not using ILLiad Authentication, or ILLiad Exclusive Authentication, the forgot password link should be commented out or removed in your coding.
