Answer

In v1, you put your key into the end of a URL:

```
https://americas.discovery.api.oclc.org/worldcat/search/v2/bibs/41266045?wskey=OUR_VALID_KEY
```

In v2, you will need to use an access token. You can obtain one by following the directions on the [OCLC Developer Network Access Tokens](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/Why_am_I_receiving_an_err...) page.
