WorldShare License Manager release notes, May 2022

Last updated: Tue, 03 May 2022 14:28:17 GMT

Release Date: May 7, 2022

Introduction

This release of WorldShare License Manager includes security improvements and bug fixes.

With this release you will be able to:

• Benefit from security updates and improvements
• Benefit from bug fixes

Bug fixes

• Occasionally, Harvest Summary calculations would remain in "Processing" status longer than usual. This has been fixed. If you had any summaries that were in Processing status, you can now review them for completeness.

• In the General section of a license, you were able to select both "Activate" and “Terminate” simultaneously on the same license. Now, only one of these statuses can be applied to a license at a time.

Known issues

There are no known issues to report.
